  - change colors and so on
- Remember to save

## Storyboard That

## ● Examples

### **Biology: Hydrological cycle (age 11-13)**

#### **The task combines biology, geography and art**

It is beneficial to create diagrams of important concepts to learn. A self-made illustration especially helps students who rely on visual and tactile learning channels.

#### **Steps**

1. Select a model, for example, a poster
2. Draw a picture by yourself or use the “search” -function.  
There are a lot of pre-made models
3. Add text to separate boxes in a picture
4. Add explanations for the important points
